

Brooklyn Museum

Mobile

There are several ways you can use your mobile phone to make your visit even better.

Look for QR (quick response) codes throughout our galleries; decoding these will give you access to new perspectives on the Museum's collection, exclusive behind-the-scenes information, exciting multimedia features, and fun games.

QR codes are special barcodes that can be read using a barcode reader app and your phone's camera. You can decode ours using any QR code reader. If you don't have one installed, just search the app store for a free reader, such as Scan by QR Code City for iPhone. Once it's installed, scan the code using the app to access each feature.

We offer free wireless access throughout our galleries and grounds. During your visit, we encourage you to switch to wifi (BrooklynMuseum) for faster download speeds.

Need information on the go? Planning your next visit?

Search for "Brooklyn Museum" in the Apple app store or the Droid marketplace and install our app for the latest news on exhibitions, events, or the *Target First Saturday* lineup; you can even browse our collection from your device.

Don't want another app?

Simply access www.brooklynmuseum.org from your mobile phone to view our mobile-friendly website.
